Objective

Frontend Developer with professional experience in building responsive, user-centric web applications using React.js, JavaScript, HTML, CSS, and Bootstrap. Skilled in developing reusable UI components, integrating REST APIs, optimizing application performance, and delivering intuitive user experiences. Strong problem-solving abilities and experience collaborating with cross-functional teams to develop scalable, high-quality web solutions using modern frontend development practices. Passionate about creating efficient, performance-driven applications and continuously expanding expertise in full-stack development with the MERN stack.

Experience

FAM Infomedia Pvt. Ltd. – Palladam, Tamil Nadu

Frontend Developer Intern [Jan 2026 – Aug 2026]

Completed a Frontend Developer internship, gaining hands-on experience in building responsive and interactive web applications using modern frontend technologies.

- Developed responsive and interactive web interfaces using HTML, CSS, JavaScript, React.js, and Bootstrap.
- Built reusable and modular React components to improve code reusability and maintainability.
- Integrated REST APIs to fetch, process, and display dynamic data in web applications.
- Collaborated with UI/UX designers and backend developers to implement responsive and user-friendly interfaces.
- Tested and optimized applications for responsiveness, performance, and cross-browser compatibility.

AWERUM - Pollachi [June 2024 – July 2024]

Successfully completed a 15-day internship focused on front-end development, gaining hands-on experience in designing and developing responsive, user-friendly web interfaces using HTML, CSS, and JavaScript.

- Implemented modern UI/UX practices to improve usability.
- Enhanced website performance and cross-browser compatibility.
- Worked on navigation menus, forms, and sliders.
- Used Git for version control.

NOVI TECH - Coimbatore [Oct 2024 – Nov 2024]

Completed a virtual internship focused on full-stack web development, gaining experience in the MERN stack.

- Developed RESTful APIs for backend integration.
- Built React-based interfaces with responsive design.
- Worked with Git version control and debugging tools.

Projects

TRAVEL ITINERARY PLANNER

- Developed a responsive travel itinerary planner using React.js, enabling users to create, edit, and manage personalized travel plans.
- Integrated real-time weather forecasting and interactive maps to help users make informed travel decisions.
- Built reusable React components and implemented efficient state management for improved maintainability.
- Designed a user-friendly and mobile-responsive interface to provide a seamless user experience across devices.

E-Commerce Website

- Built a fully responsive e-commerce application using React.js with dynamic product listings, shopping cart, and secure checkout functionality.
- Implemented React Router for seamless navigation and Context API for efficient global state management.
- Developed features including product search, category filtering, cart management, and order summary.
- Designed reusable UI components and optimized application performance for a smooth shopping experience.

Gemini Clone

- Developed an AI-powered chatbot interface using React.js and Vite, replicating the user experience of Google's Gemini.
- Integrated the Gemini API to provide real-time conversational responses based on user queries.
- Implemented responsive chat UI, loading indicators, and conversation history for enhanced usability.
- Structured the project with reusable components and optimized API handling for improved performance.

Smart-LMS (Learning Management System)

- Developed a full-stack Learning Management System using React.js, Node.js, Express.js, and MongoDB.
- Implemented secure user authentication and authorization for students and administrators.
- Designed modules for course management, enrollment, progress tracking, and dynamic content delivery.
- Built RESTful APIs for seamless communication between the frontend and backend, ensuring efficient data management.

Fit Fusion (Gym & Fitness Management Platform)

- Developed a full-stack Gym & Fitness management platform using Next.js, React, Tailwind CSS, Node.js, Express.js, and PostgreSQL with role-based Admin, Trainer, and Member dashboards.
- Implemented JWT authentication and role-based access control with Admin-managed user creation and Member-Trainer assignment functionality.
- Built membership and payment management features with UPI integration, automatic QR code generation, transaction tracking, and invoice generation.
- Designed responsive, user-friendly interfaces with workout management, attendance tracking, payment history, and 80mm thermal receipt printing.

Education

Dr. Mahalingam College of Engineering and Technology [2022 – 2026]

- B.Tech Information Technology CGPA: 8.1

Our Lady of Lourdes Matriculation Higher Secondary School [2019 – 2022]

- Higher Secondary Certificate: 70.3
- Secondary School Leaving Certificate: 67.8

Technologies

Languages: Java

Front-End: HTML, CSS, JavaScript, React.js

Back-End: Node.js, Express.js

Database: MongoDB, SQL

Operating System: Linux

Tools & Technologies: VS Code, Power BI, Git, GitHub, Android Studio

Certifications

- Power BI workshop (Nov 2024)
- Android Development using Flutter – KPR College (Feb 2024)
- BEC Certificate – Cambridge University (Feb 2023)
- NPTEL – Industry 4.0 and Data Analytics with Python (Elite)
- Infosys SpringBoard: Bootstrap, React.js, JavaScript
- Linux Administration – Expertisor Academy
- Full Stack Development(MERN Stack) - Expertisor Academy
- Oracle Fusion Cloud HCM Certified Foundations Associate
- NCC B Certificate (A Grade)
- NCC C Certificate (B Grade)

Achievements

- Attended Combined Annual Training Camp-I – NCC
- Attended Annual Training Camp-II – NCC
- Participated in EBSB National Camp – NCC
